| 6 | Program description     | <p>The program started with welcome address and introduction to the resource person by Dr. Sinthiya Saroja She is taking about women's health Being a man or a woman has a significant impact on health, as a result of both biological and gender-related differences. The health of women and girls is of particular concern because, in many societies, they are disadvantaged by discrimination rooted in sociocultural factors. A healthy body is essential for growth and development. There are many people, both young and old, that have to learn how to get and stay healthy. One of the first steps in learning how to be healthy is to become aware of one's current health status. The next step would be to learn how to go from current health status to a healthier status. It is unfortunate that most people do not work on their health until something goes wrong in their bodies. If they were aware of their health prior to that, then it is possible they could have prevented anything from going wrong with their health. The session concluded with an interactive session between the resource person and the students. The session ended with vote of thanks by the program coordinator Dr. A. Annalakshmi, HoD/CSE.</p> |
| 7 | Outcome of this program | The students are motivated to know the importance of women in the society and importance of women's Health and Hygiene.   |
