Assistive Technology and Facilities for persons with disabilities accessible websites, screen reading software, mechanic equipment

Thamirabharani Engineering College employs assistive technology, allowing students with disabilities to confidently complete their tasks without compromising on time or facing any other challenges. Each year, the institution purchases Windows OS, which inherently includes tools related to assistive technology. This initiative aims to enhance the lifestyles of students with disabilities, fostering increased social participation, security, control, and a greater potential to reduce institutional costs. Vision tools: The following tools are implemented for students with visual disabilities.

(i) **High Contrast tool:** While implementing this option clear vision is obtained without much strain while working for long duration in front of a screen, new dark themes and contrast themes can be used to reduce screen brightness and increase contrast without reducing the aesthetic effect.

(ii) **Display tool:** This option helps to adjust text size, customize the colour and the size of the mouse cursor

(iii) **Magnifier tool:** Similar to a digital magnifying glass, a magnifier can be used to enlarge words and images on part of the screen or full screen.

2. Hearing tool: This tool is designed for students with hearing disabilities. From capturing to audio options, Windows provides settings and features to address difficulties in hearing. Whether experiencing challenges in hearing or learning a new language, or watching a video in a noisy environment, captions can be utilized to read the spoken words in the videos. The redesigned caption themes in Windows make it easier to customize the experience, including text size, font, color, and background.

3. Narrator tool: This tool is implemented for students with visual disabilities. This option Narrator provides simplified navigation and audio explanations so that the visually impaired can simply interact with everything on the screen using the keyboard or preferred Braille device.
