<u>REPORT OF THE PROGRAM</u>		
1	Program Name	Seminar on RESEARCH METHODOLOGY.
2	Date of program	11.07.2018
3	Resource person:	Dr. D. David Neels Ponkumar
4	Participants	36
5	Objective of program	The objective of research should address the underlying purpose of investigation and analysis. It should outline the steps you'd take to achieve desirable outcomes. Research objectives help you stay focused and adjust your expectations as you progress.
6	Program description	<p>The program started with a welcome address and introduction to the resource person by Mr.AL. Karthikeyan, Assistant Professor and HOD of MECHANICAL Department. 36 faculty members attended the seminar. The resource person explained in detail about Research Application means use of a Licensed Product or component thereof for research and clinical research applications. For purposes herein, the performance of a clinical trial using a Licensed Product during the Collaboration shall be deemed a Research Application.</p> <p>The session concluded with an interactive session between the instructor and the Staff in which the queries of the staff were addressed satisfactorily. The session ended with vote of thanks by, Mr. P. Prabakaran AP/MECHANICAL</p>
7	Outcome of this program	The staff got knowledge on Research Methodology and its applications.

REPORT OF THE PROGRAM

1	Program Name	Seminar on Application Of Fluid Kinematics.
2	Date of program	13.07.2018
3	Resource person:	Dr. Vimala Ebanesar, Prof/Civil, VVCOE
4	Participants	14
5	Objective of program	The objective of Fluid kinematics is a term from fluid mechanics, usually referring to a mere mathematical description or specification of a flow field, divorced from any account of the forces and conditions that might actually create such a flow.
6	Program description	<p>The program started with welcome address and introduction to the resource person by Mr. AL. Karthikeyan, Assistant Professor and HOD of MECHANICAL Department. 14 faculty members attended the seminar. The resource person explained in detail about The study of fluids at rest is called fluid statics. The study of fluids in motion, where pressure forces are not considered, is called fluid kinematics and if the pressure forces are also considered for the fluids in motion, that branch of science is called fluid dynamics. Fluid kinematics is a term from mechanics, usually referring to a mere mathematical description or specification of a flow field, divorced from any account of the forces and conditions that might actually create such a flow. The term fluids includes liquids or gases, but also may refer to materials that behave with fluid-like properties, including crowds of people or large numbers of grains if those are describable approximately under the continuum hypothesis as used in continuum mechanics.</p> <p>The session concluded with an interactive session between the instructor and the Staff in which the queries of the staff were addressed satisfactorily. The session ended with vote of thanks by, Mr. R.Saravana Kumar AP/MECHANICAL.</p>
7	Outcome of this program	The staff got knowledge on Application Of Fluid Kinematics.

<u>REPORT OF THE PROGRAM</u>		
1	Program Name	Seminar on "CONCEPTS OF SCHEDULING IN REAL-TIME SYSTEMS"
2	Date of program	13.09.2018
3	Resource person:	Mr. D. G. David
4	Participants	36
5	Objective of program	The main objective of the seminar is to understand the Concepts of Scheduling In Real-Time Systems.
6	Program description	<p>The program started with a welcome address and introduction to the resource person was given by Dr. A. Anna Lakshmi HoD/CSE. 36 faculty members of all departments attended the seminar. The resource person explained in detail Real-time systems are systems that carry real-time tasks. These tasks need to be performed immediately with a certain degree of urgency. In particular, these tasks are related to control of certain events (or) reacting to them. Real-time tasks can be classified as hard real-time tasks and soft real-time tasks.</p> <p>A hard real-time task must be performed at a specified time which could otherwise lead to huge losses. In soft real-time tasks, a specified deadline can be missed. This is because the task can be rescheduled (or) can be completed after the specified time.</p> <p>In real-time systems, the scheduler is considered as the most important component which is typically a short-term task scheduler. The main focus of this scheduler is to reduce the response time associated with each of the associated processes instead of handling the deadline.</p> <p>If a preemptive scheduler is used, the real-time task needs to wait until its corresponding task's time slice completes. In the case of a non-preemptive scheduler, even if the highest priority is allocated to the task, it needs to wait until the completion of the current task. This task can be slow (or) of the lower priority and can lead to a longer wait. The session was concluded with vote of thanks by the program coordinator, Mrs. M. Suganthi M. E., AP/CSE.</p>
7	Outcome of this program	The students can understand and real-time scheduling System is composed of the scheduler, clock and the processing hardware elements.

REPORT OF THE PROGRAM

1	Program Name	Seminar on Articulated Idea For Outcome Based Education
2	Date of program	08. 10. 2018 to 12.10.2018
3	Resource persons:	Dr. K.Arulmozhi, Dr. R.Sabarimala, Dr. D. David NeelsPonkumar
4	Participants	45
5	Objective of program	The main objective of the Seminar on The NATIONAL ASSESSMENT AND ACCREDITATION COUNCIL (NAAC) conducts assessment and accreditation of Higher Educational Institutions (HEI) such as colleges, universities or other recognized institutions to derive an understanding of the 'Quality Status' of the institution.
6	Program description	<p>The program started with welcome address. 45 faculty members of circuit branches and Non circuit branches attended the seminar. The resource person explained in detail about NAAC accreditation determines the quality of the institute in terms of education, research, infrastructure, teaching & learning, placement etc. The institution also gets many benefits after getting accreditation by NAAC. OBE is an educational theory that bases each part of an educational system around goals (outcomes). By the end of the educational experience, each student should have achieved the goal. It helps the institutes in the allocation of resources. It helps in planning in the internal areas.</p> <p>NAAC accreditation is mandatory for all the higher learning institutes, particularly state universities. Without NAAC accreditation, universities are not eligible for UGC grants, RUSA grants, financial aid etc.</p> <p>NAAC is an accreditation body, which comes under the University Grants Commission of India.</p>
7	Outcome of this program	The staffs can understand the about NAAC. The NATIONAL ASSESSMENT AND ACCREDITATION COUNCIL (NAAC) conducts assessment and accreditation of Higher Educational Institutions (HEI) such as colleges, universities or other recognized institutions to derive an understanding of the 'Quality Status' of the institution.

<u>REPORT OF THE PROGRAM</u>		
1	Program Name	Seminar on working of signal generator
2	Date of program	13.11.2018
3	Resource person:	Dr. Prithiviraj
4	Participants	20
5	Objective of program	The main objective of the Seminar is to give knowledge about working of signal generator to all staff members
6	Program description	The program started with a welcome address and introduction to the resource person by Mrs. A. Kanagalakshmi, HoD of ECE Department. 20 faculty members of ECE & EEE branches attended this Seminar. The resource person explained in detail about how the signal generator works. Difference between function generator and signal generator was given to all staff members and asked them to use those devices to know about its applications. Resource person conveyed the importance of the signal generator in the lab. The session concluded with an interactive session between the instructor and the staff members in which the queries of the staff were addressed satisfactorily. The session was very clear, understandable and informative. The session ended with a vote of thanks by the program coordinator, Mr. A. NiyasAhamed, AP/ECE.
7	Outcome of this program	The staff members gained knowledge regarding the working of signal generators.

REPORT OF THE PROGRAM

1	Program Name	Seminar on "Modern Aspects Of Soft Computing Using Matlab "
2	Date of program	14.11.2018
3	Resource person:	Mr. M. Ramnath
4	Participants	20
5	Objective of program	The main objective of the seminar is to understand the Concepts of Scheduling In Real-Time Systems.
6	Program description	<p>The program started with a welcome address and introduction to the resource person was given by Dr. A. Anna Lakshmi HoD/CSE. 20 faculty members of all departments attended the seminar. MATLAB is a high-performance language for technical computing. It integrates computation, visualization, and programming in an easy-to-use environment where problems and solutions are expressed in familiar mathematical notation.</p> <p>MATLAB features a family of application-specific solutions called toolboxes. Very important to most users of MATLAB, toolboxes allow you to learn and apply specialized technology. Toolboxes are comprehensive collections of MATLAB functions (M-files) that extend the MATLAB environment to solve particular classes of problems. Areas in which toolboxes are available include signal processing, control systems, neural networks, fuzzy logic, wavelets, simulation, and many others.</p> <p>This is a high-level matrix/array language with control flow statements, functions, data structures, input/output, and object-oriented programming features. It allows both "programming in the small" to rapidly create quick and dirty throw-away programs, and "programming in the large" to create complete large and complex application programs. The session was concluded with vote of thanks by the program coordinator, Mr. R. Jeeva M. E., AP/CSE.</p>
7	Outcome of this program	The students can understand a vast collection of computational algorithms ranging from elementary functions like sum, sine, cosine, and complex arithmetic, to more sophisticated functions like matrix inverse, matrix eigenvalues, Bessel functions, and fast Fourier transforms.

REPORT OF THE PROGRAM

1	Program Name	Seminar on Professional Development Training Program on RECENT ADVANCES IN ENGINEERING & TECHNOLOGY
2	Date of program	12.12.2018
3	Resource person:	Mr. A. Rajesh
4	Participants	26
5	Objective of program	The main objective of the seminar is to understand the recent trends in engineering and technology.
6	Program description	<p>The program started with a welcome address and introduction to the resource person was given by Mr. Abdur Raheem HoD/CIVIL. 60 faculty members of all departments attended the seminar.</p> <p>The resource person explained in detail about the latest trends in engineering and technologies. He shared ICRTET-18 related to this topic and stimulated and enriched it by the latest in engineering research and development while delving into presentations surrounding transformative advances provided by a variety of disciplines.</p> <p>The main goal of the seminar is to educate and motivate the participants to develop skill dynamics which must be the high priority of Indian technical education for Engineering & Technology development in our country in an extraordinary manner. He also explained the endeavor to provide the best through lectures, paper presentation and students activities which will be a part of this seminar.</p> <p>The session was concluded with vote of thanks by the program coordinator, Mrs. E. Sakthi Elakkiya, M. E., AP/CIVIL.</p>
7	Outcome of this program	The staff members can understand and get knowledge about this topic recent trends in engineering and technology.

REPORT OF THE PROGRAM

1	Program Name	Seminar on DIGITAL WATERMARKING TECHNIQUES AND ITS APPLICATION
2	Date of program	13.12.2018
3	Resource person:	Mr. D. G. David
4	Participants	20
5	Objective of program	The main objective of the Seminar is to give knowledge about Digital Watermarking Techniques and its Application to student community
6	Program description	The program started with a welcome address and introduction to the resource person by Mrs. A. Kanagalakshmi, HoD of ECE Department. 20 faculty members from various branches attended this Seminar. The resource person explained in detail about Requirements and design of watermarking techniques are impacted by the different types of content in two major ways: imperceptibility and robustness requirements. Factor for designing watermarking schemes for multimedia is the type of degradations that the watermark is expected to survive and system requirements for media specific applications are explained. The session concluded with an interactive session between the instructor and the faculty members in which the queries of the students were addressed satisfactorily. The session was very clear, understandable and informative. The session ended with a vote of thanks by the program coordinator, Mr. V. Arunachalam, AP/ECE.
7	Outcome of this program	The staff members gained knowledge regarding how to apply Digital watermarking techniques in digital image processing.

REPORT OF THE PROGRAM

1	Program Name	Recent Trends on Mobile Application Development
2	Date of program	05.02.2019
3	Resource person:	Mrs. M. Suganthi
4	Participants	25
5	Objective of program	The main objective of the seminar is to understand the concepts of Mobile Application Development.
6	Program description	<p>The program started with a welcome address and introduction to the resource person was given by Dr. A. Anna Lakshmi, HoD/CSE. 25 faculty members of all departments attended the seminar. The resource person uncovered the insights and trends in mobile application development is the process of creating software applications that run on a mobile device, and a typical mobile application utilizes a network connection to work with remote computing resources.. He also explained how to utilize almost any web programming language and databases for the back-end. For native mobile apps, you have to choose a technology stack required by each mobile OS platform.</p> <p>He put forth the importance of Mobile application development is the set of processes and procedures involved in writing software for small, wireless computing devices, such as smartphones and other hand-held devices. Like web application development, mobile application development has its roots in more traditional software development. One critical difference, however, is that mobile apps are often written specifically to take advantage of the unique features of a particular mobile device..</p> <p>The session concluded with an interactive session between the speaker and the participants in which the queries were addressed effectively. The session was very clear, understandable and informative. The session was concluded with a vote of thanks by the program coordinator, Mr. D. G. David, AP/CSE.</p>
7	Outcome of this program	The faculty can understand the Recent Trends on Mobile Application Development.

REPORT OF THE PROGRAM

1	Program Name	Seminar on PRODUCT DEVELOPMENT USING COMPUTATIONAL FLUID DYNAMICS.
2	Date of program	04.03.2019
3	Resource person:	Mr. R. Saravana Kumar
4	Participants	23
5	Objective of program	The objective of A contract for differences (CFD) is a financial contract that pays the differences in the settlement price between the open and closing trades. CFDs essentially allow investors to trade the direction of securities over the very short-term and are especially popular in FX and commodities products.
6	Program description	<p>The program started with a welcome address and introduction to the resource person by Mr.AL. Karthikeyan, Assistant Professor and HoD of MECHANICAL Department. 23 faculty members attended the seminar. The resource person explained in detail about Computational fluid dynamics (CFD) is a branch of fluid mechanics that uses numerical analysis and data structures to analyze and solve problems that involve fluid flows. Computers are used to perform the calculations required to simulate the free-stream flow of the fluid, and the interaction of the fluid (liquids and gases) with surfaces defined by boundary conditions. With high-speed supercomputers, better solutions can be achieved, and are often required to solve the largest and most complex problems. Ongoing research yields software that improves the accuracy and speed of complex simulation scenarios such as transonic or turbulent flows. Initial validation of such software is typically performed using experimental apparatus such as wind tunnels. In addition, previously performed analytical or empirical analysis of a particular problem can be used for comparison. A final validation is often performed using full-scale testing, such as flight tests.</p> <p>The session concluded with an interactive session between the instructor and the Staff in which the queries of the staff were addressed satisfactorily. The session ended with a vote of thanks by Mr. P. Prabakaran AP/MECHANICAL.</p>
7	Outcome of this program	The staff got knowledge on Product Development Using Computational Fluid Dynamics, and its applications.

REPORT OF THE PROGRAM

1	Program Name	Seminar on Unsymmetric Bending Analysis.
2	Date of program	21.03.2019
3	Resource person:	Mr. M. Muthu Ganesh
4	Participants	25
5	Objective of program	The objective of In unsymmetrical bending of a beam To prevent torsion, the line of application of the load must pass through the shear Center. The beam can be clamped with freedom to rotate in any direction.
6	Program description	<p>The program started with a welcome address and introduction to the resource person by Mr.AL. Karthikeyan. Assistant Professor and HOD of MECHANICAL Department. 25 faculty members attended the seminar. The resource person explained in detail about In unsymmetrical bending of a beam also known as complex or biaxial bending the main axes of the cross-section does not coincide with the direction of loading. The beam can be clamped with freedom to rotate in any direction. This enables investigation of loading along the main axis or of the general load case.</p> <p>The session concluded with an interactive session between the instructor and the Staff in which the queries of the staff were addressed satisfactorily. The session ended with vote of thanks by Mr. P. Arumugam AP/MECHANICAL.</p>
7	Outcome of this program	The staff got knowledge on Unsymmetrical Bending Analysis and its applications.

REPORT OF THE PROGRAM

1	Program Name	Seminar on DESIGN CONCEPT IN FPGA AND ASIC
2	Date of program	23.04.2019
3	Resource person:	Mrs. R. S. Bini,
4	Participants	19
5	Objective of program	The main objective of the Seminar is to gain a thorough knowledge on "Design concept in FPGA and ASIC" to strengthen the student community through our faculty.
6	Program description	<p>The program started with a welcome address and introduction to the resource person by Mr. Ramar Kalangiami, AP of ECE Department. 19 faculty members from various branches attended this Seminar. The resource person explained in detail about the biggest advantage of designing a SoC to FPGAs for production is the short span from concept to production. The following questions were asked by the participants and the resource person answered and explained them in a very neat manner.</p> <ol style="list-style-type: none"> 1. What is ASIC (Application Specific Integrated Circuit) Design in the embedded world? 2. What is FPGA design? 3. What is FPGA prototyping? 4. What are the challenges in FPGA board design? 5. What is the need for spice simulation in mixed-signal SoC design? 6. What are the challenges faced in FPGA to ASIC conversion? 7. What are the challenges faced by Digital ASIC Design engineers in Mixed-signal Integrated Circuit design? 8. What is a logic cell in Xilinx FPGA? 9. How does FPGA synthesis work? 10. What are the quick ways to overcome FPGA to ASIC conversion challenges? <p>The session ended up with an interactive session between the instructor and the faculty members. The session was very clear, understandable and informative. The session ended with a vote of thanks proposed by the program coordinator, Mr. V. Arunachalam, AP/ECE.</p>
7	Outcome of this program	The staff members gained knowledge on "Design concepts in FPGA and ASIC."

REPORT OF THE PROGRAM

1	Program Name	AN ANALYSIS OF PYTHON PROGRAMMING LANGUAGE
2	Date of program	06.03.2019
3	Resource person:	Mrs. G. Twinkle Geogini
4	Participants	25
5	Objective of program	The main objective of the seminar is to understand the concepts of An Analysis on Python Programming Language
6	Program description	<p>The program started with a welcome address and introduction to the resource person was given by Dr. A. Anna Lakshmi, HoD/CSE. 25 faculty members of all departments attended the seminar. The resource person uncovered the insights and trends in Python, an interpreted high-level general-purpose programming language. Its design philosophy emphasizes code readability with its use of significant indentation. Its language constructs as well as its object-oriented approach aim to help programmers write clear, logical code for small and large-scale projects.</p> <p>Python can be used to develop web applications very easily using frameworks of python such as Django, Pyramid, Flask and Bottle and also content management systems such as Plone and django CMS. Python's standard library is used to integrate and support many internet protocols such as HTTPS, FTP, SSL etc. and even help in the processing of JSON, XML, EMail and so much more. The session concluded with an interactive session between the speaker and the participants in which the queries were addressed effectively. The session was very clear, understandable and informative. The session was concluded with vote of thanks by the program coordinator, Mr. G. Durga Devi, AP/CSE.</p>
7	Outcome of this program	The faculty can understand An Analysis on Python Programming Language.
